DBMS COURSE PROJECT
CS2011E Database Management Systems

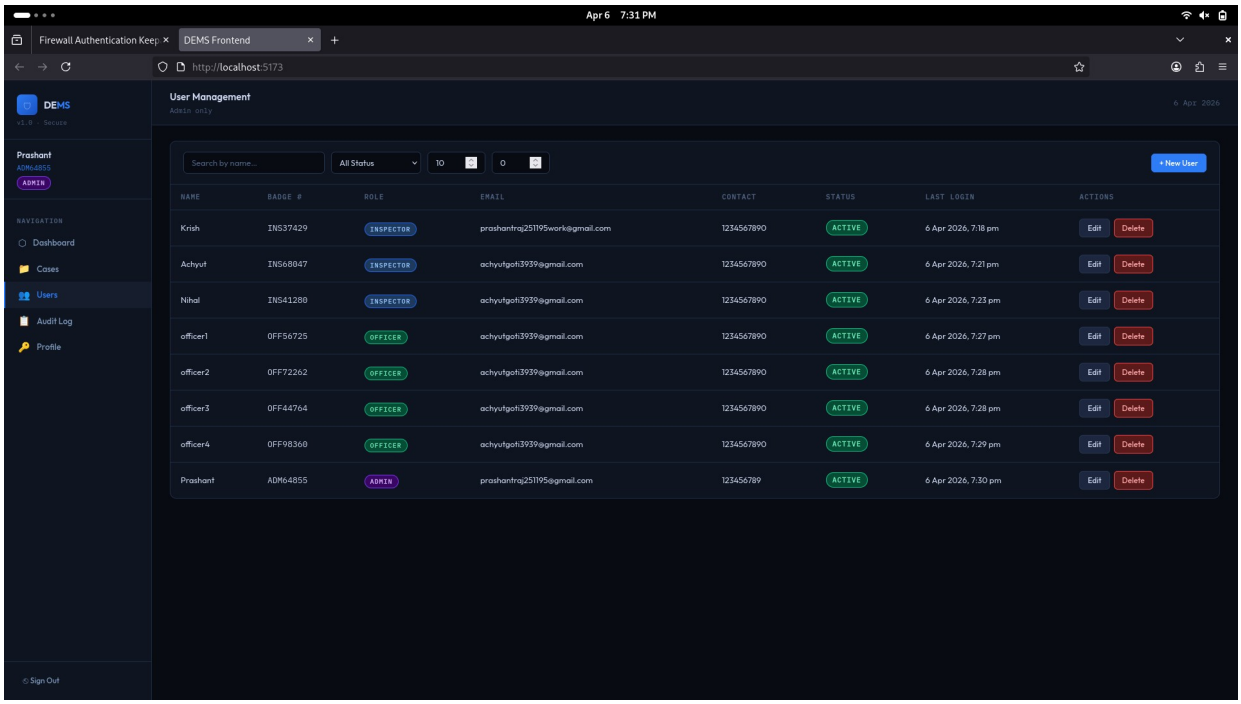
TEAM MEMBERS:
1.Prashant Raj – B240272CS
2.Nihal Kumar – B240254CS
3.Dhameliya Krish Vedantkumar – B240167CS
4.Goti Achyut Yatinbhai – B240184CS

Implementation & Testing Screenshots:

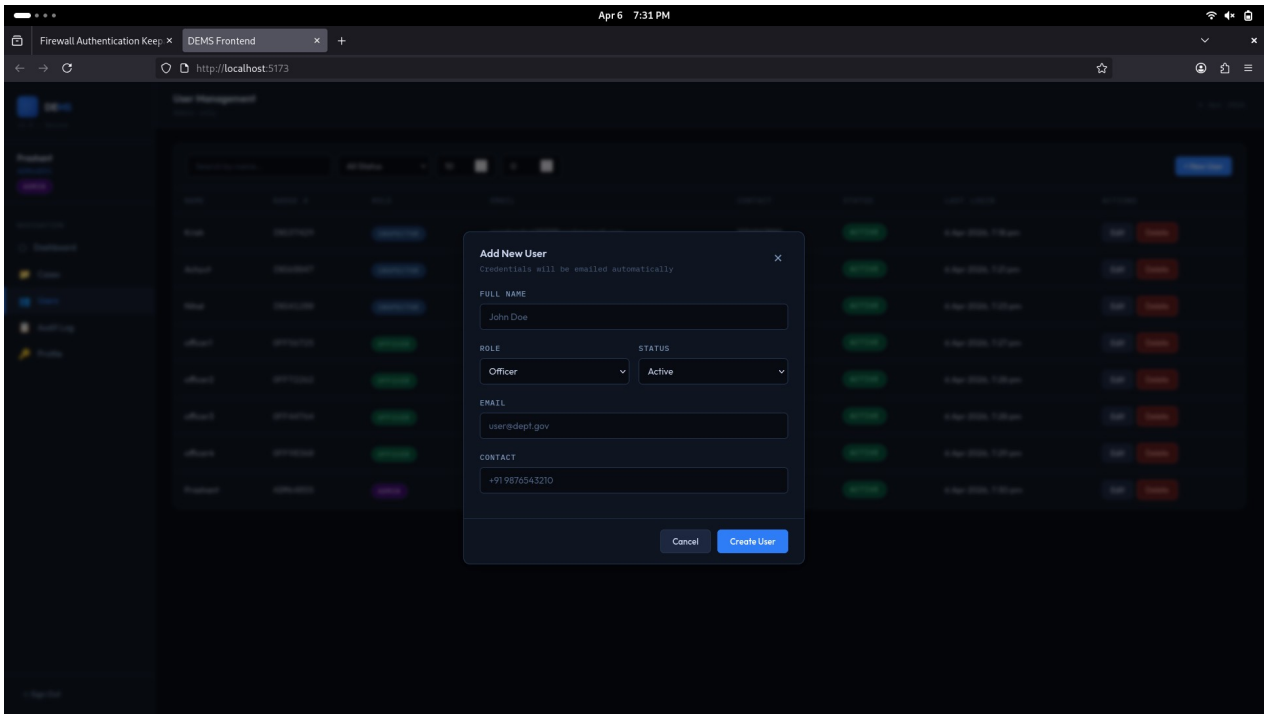
- There are a total of three roles: ADMIN , INSPECTOR , OFFICER.

#1.ADMIN(What an admin can do):

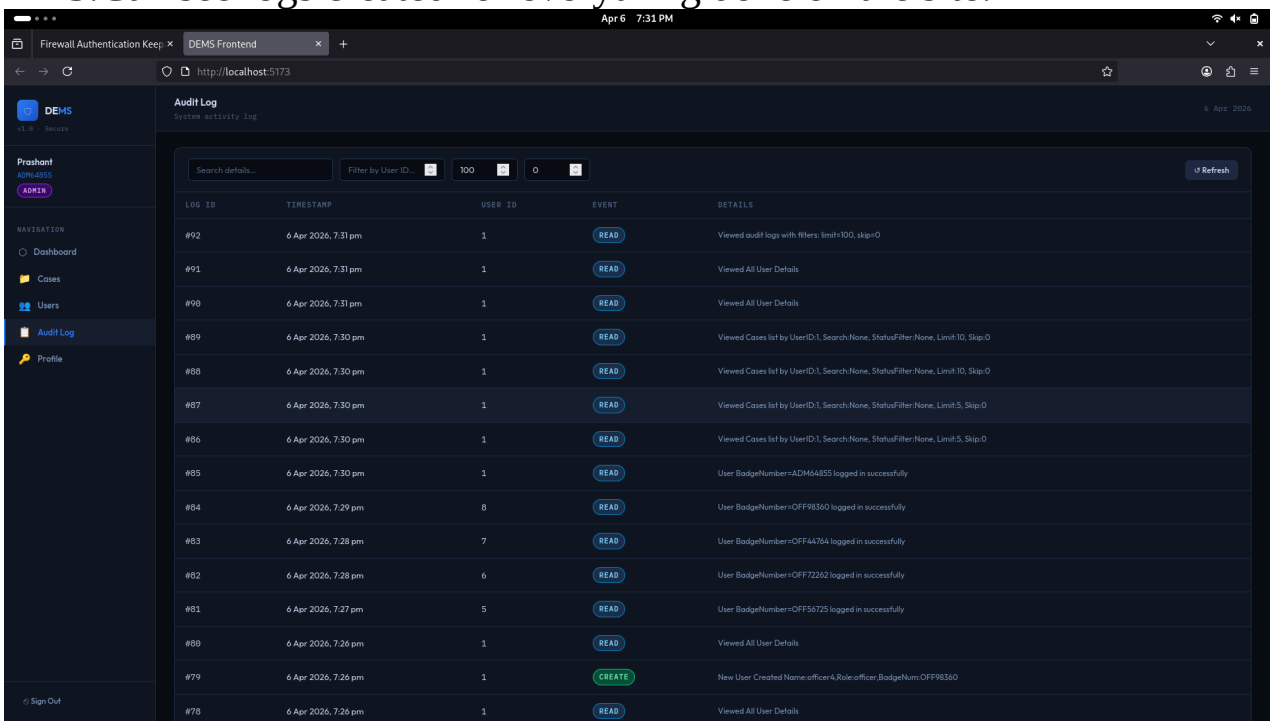
1.See the lsit of the users:



2.Add a user:



3.Can see logs created for everything done on the site:



4.Can see list of cases , can view details of them , wihtin which he/she can edit following things and can delete cases.(NOTE:Deleting anything is permitted for ADMIN only.)

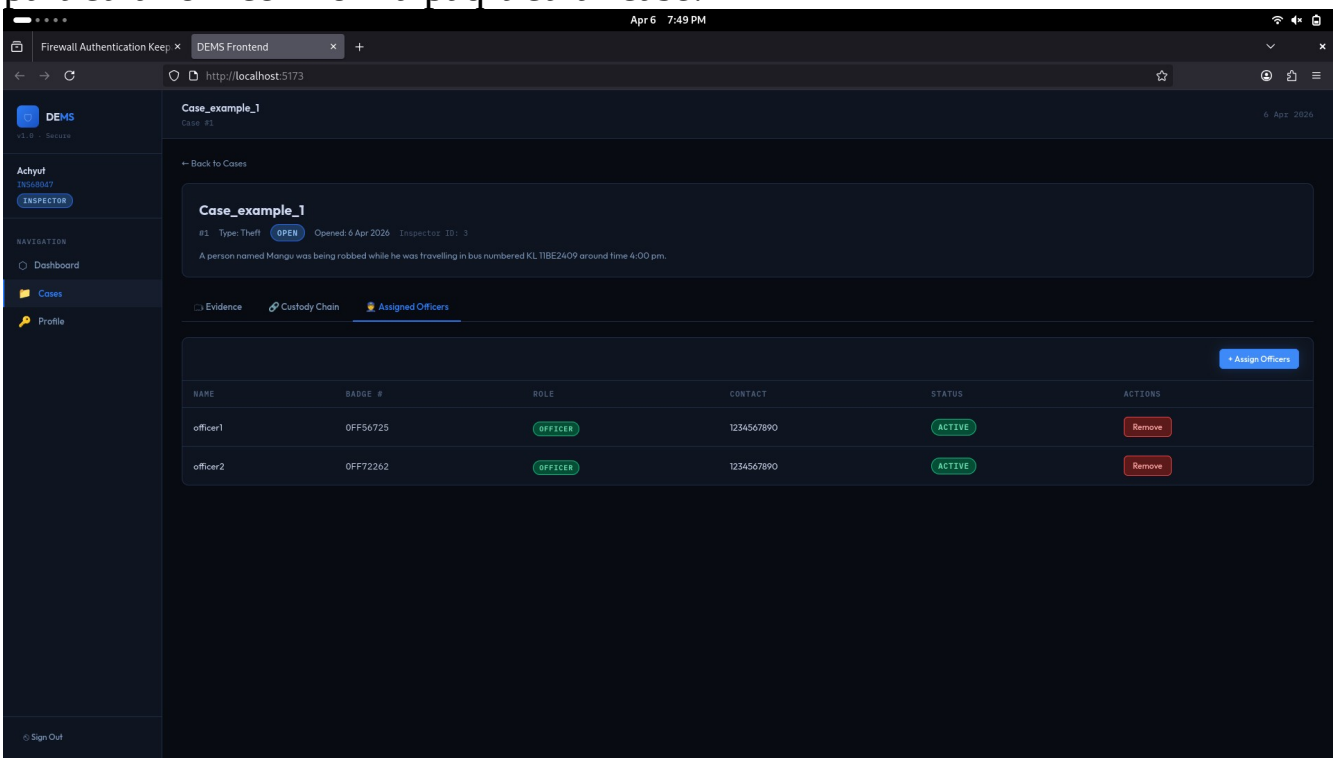
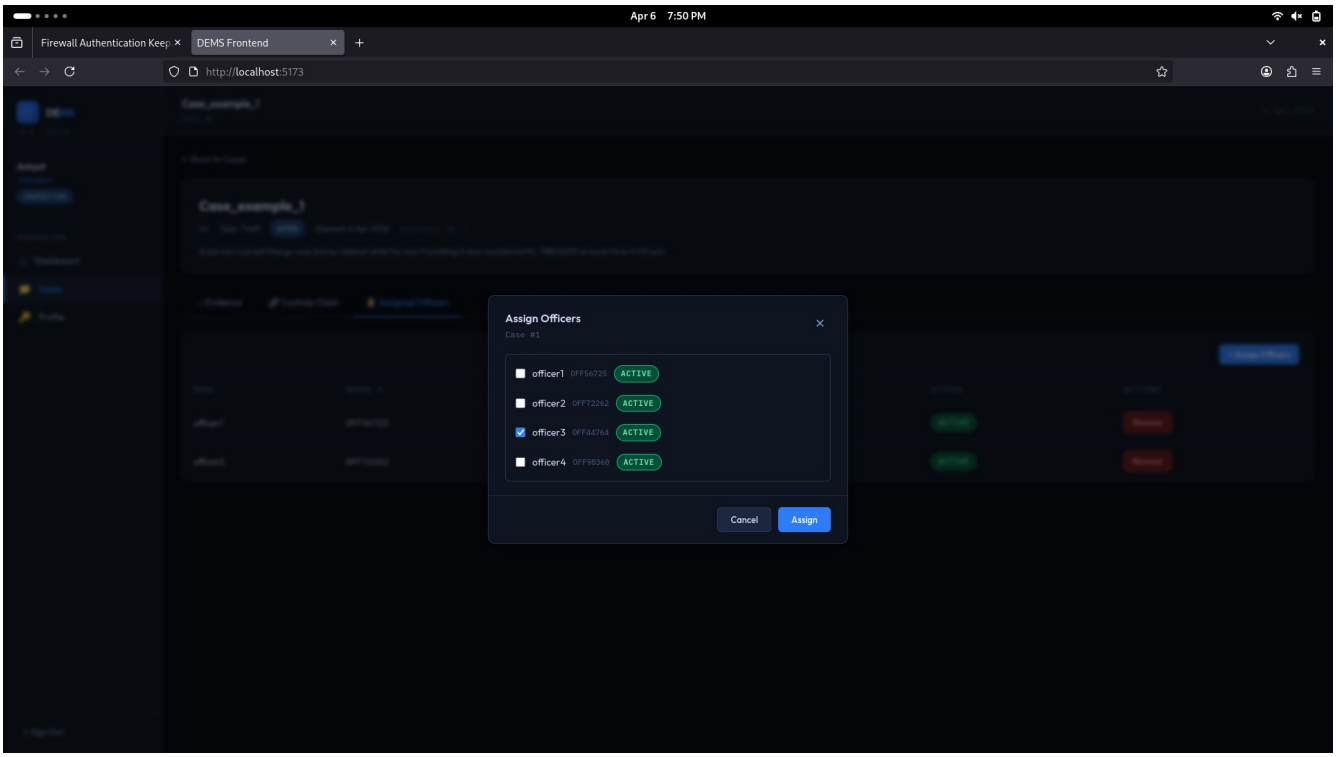
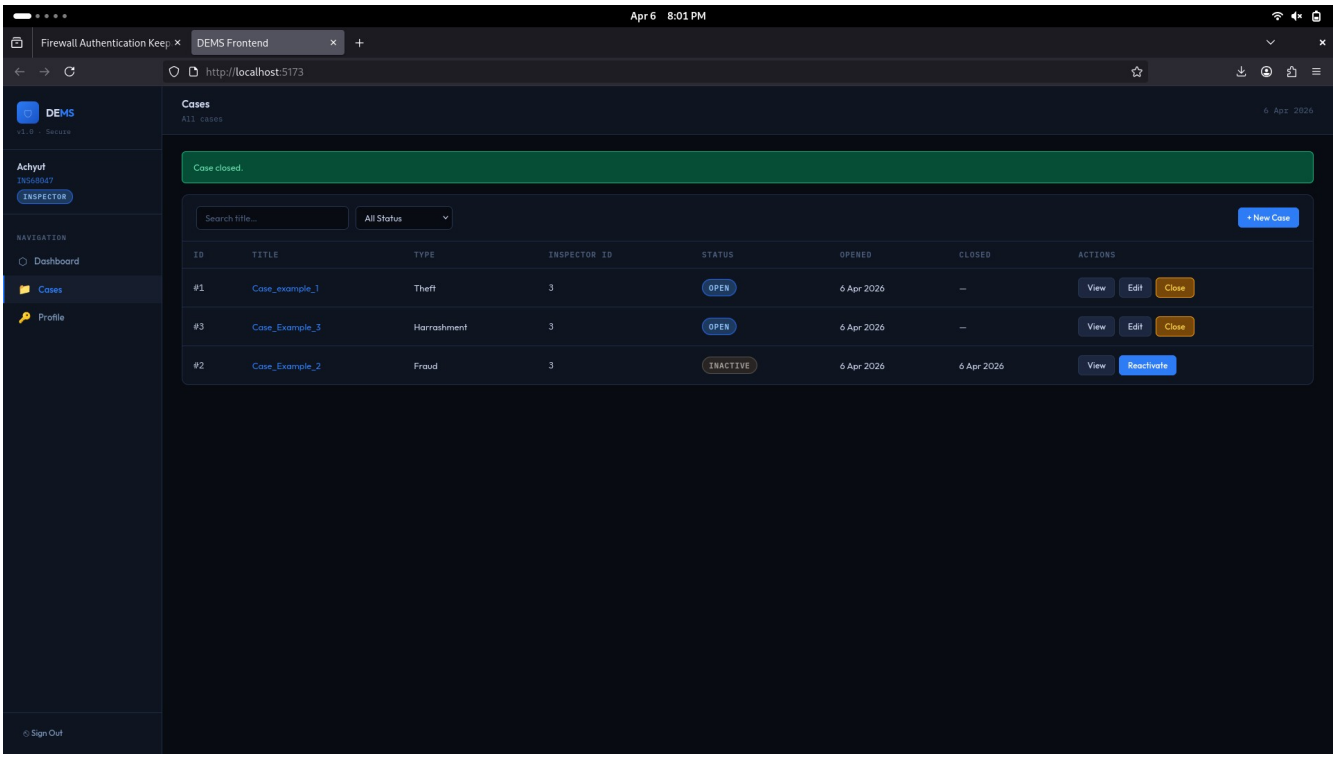
5.Can see the officers assigned for each case and even add and remove particular officer from a paqrticular case:



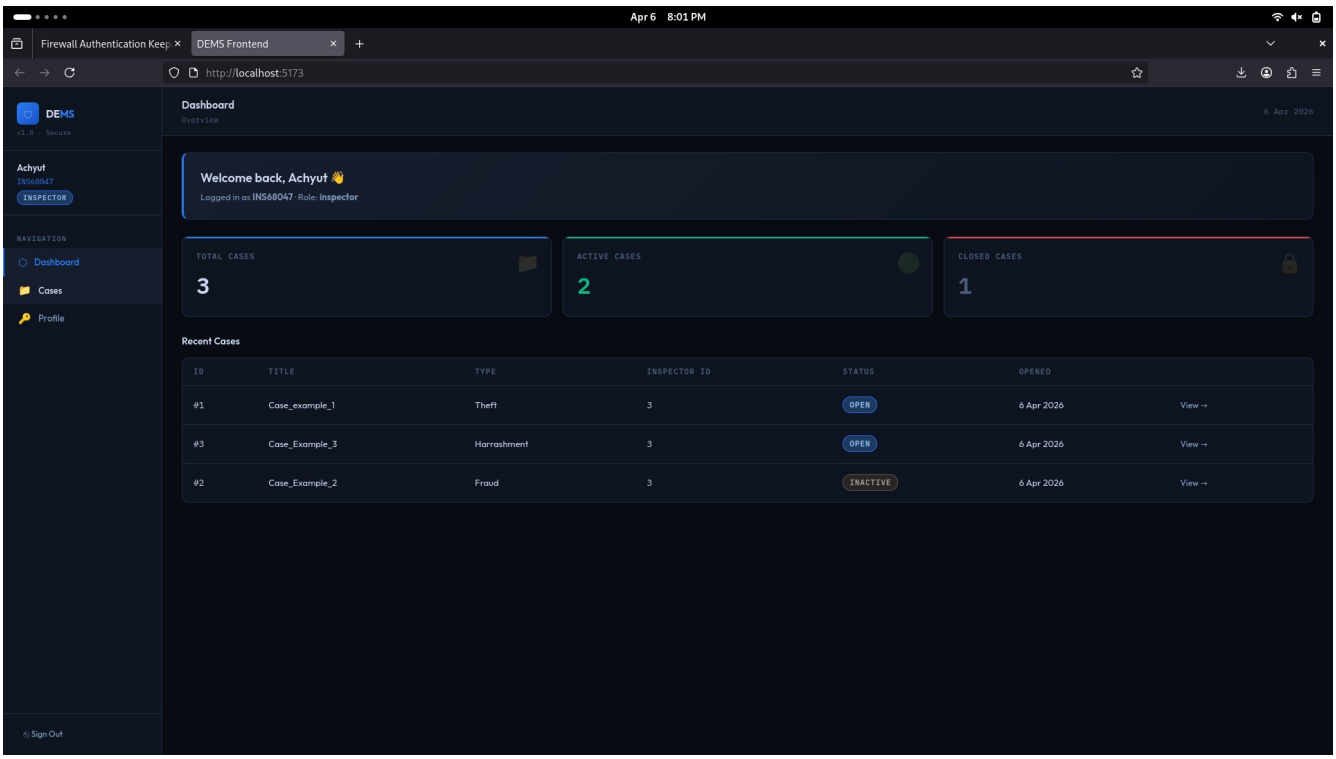
•



6.Can close a active case and reactivate a closed case:

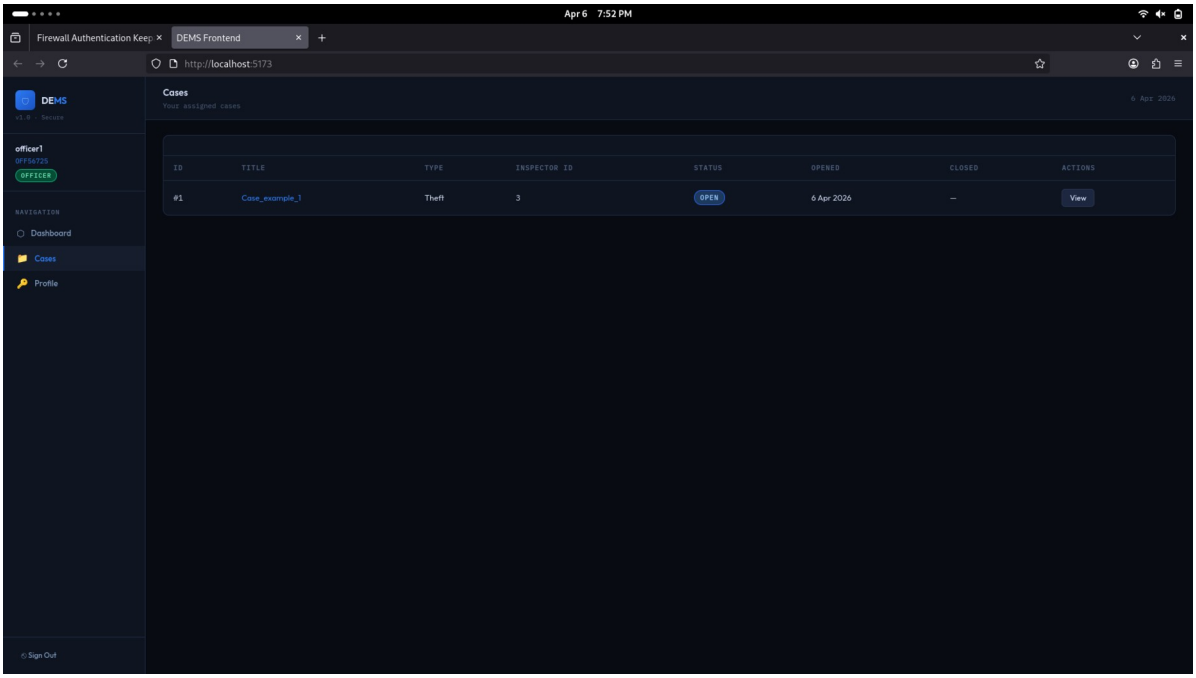


7.On dashboard inspector can see the no. of active and no. of closed cases:

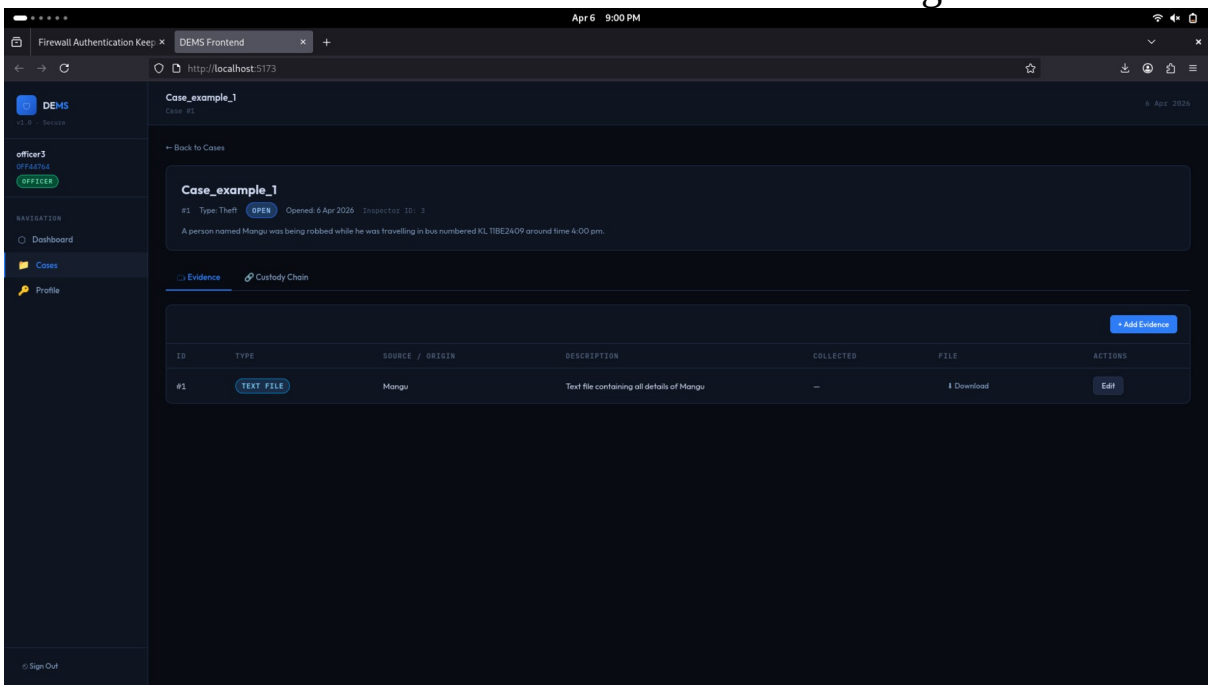


#3.OFFICER(what an officer can do);

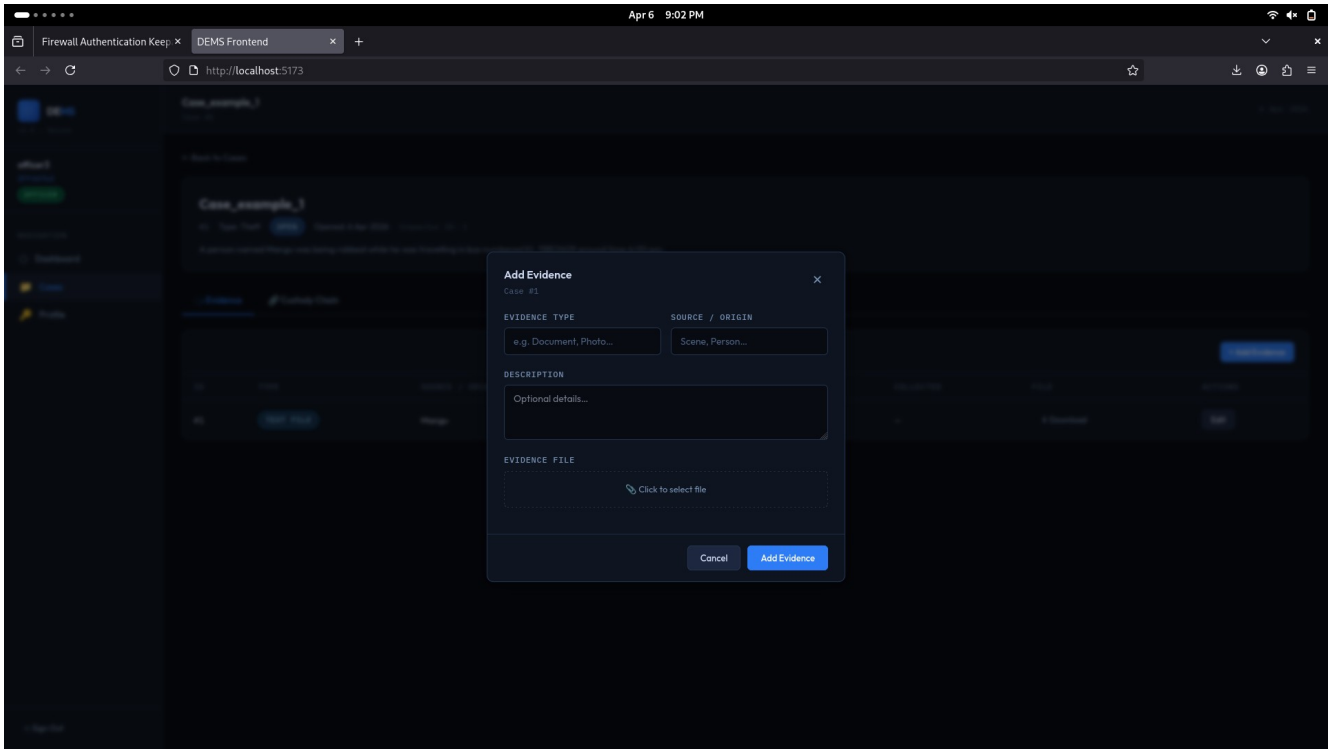
1.Can see list of cases particularly assigned to him/her and view each of them.



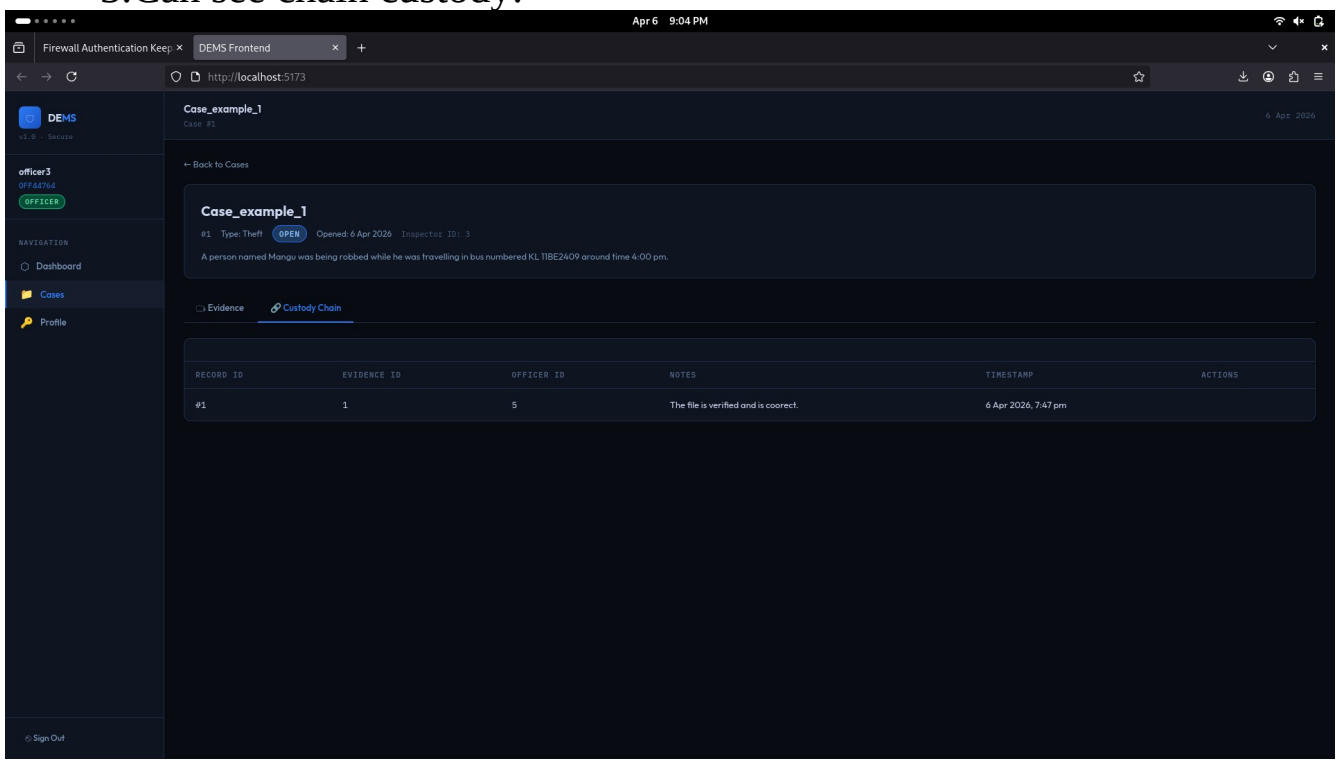
2.Can add evidence and edit them for each case assigned to him/her:



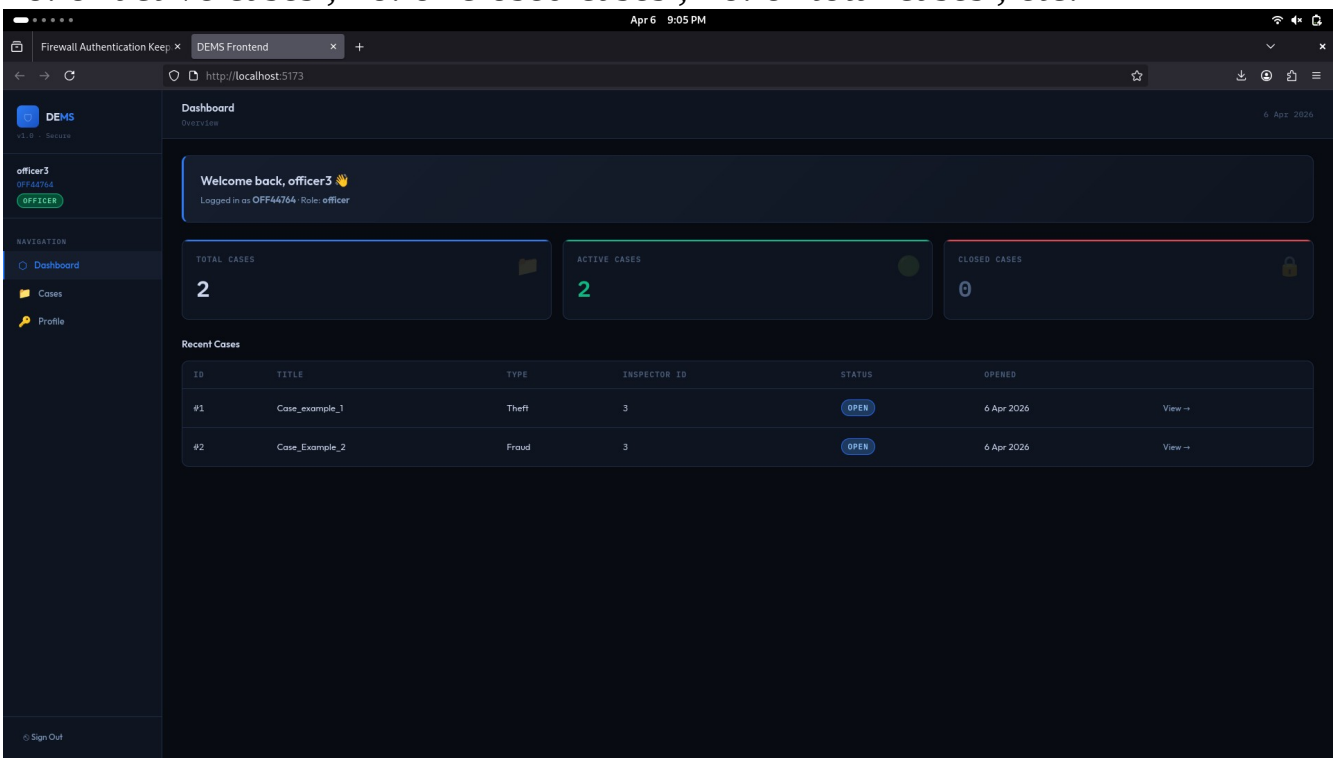
•



3.Can see chain custody:

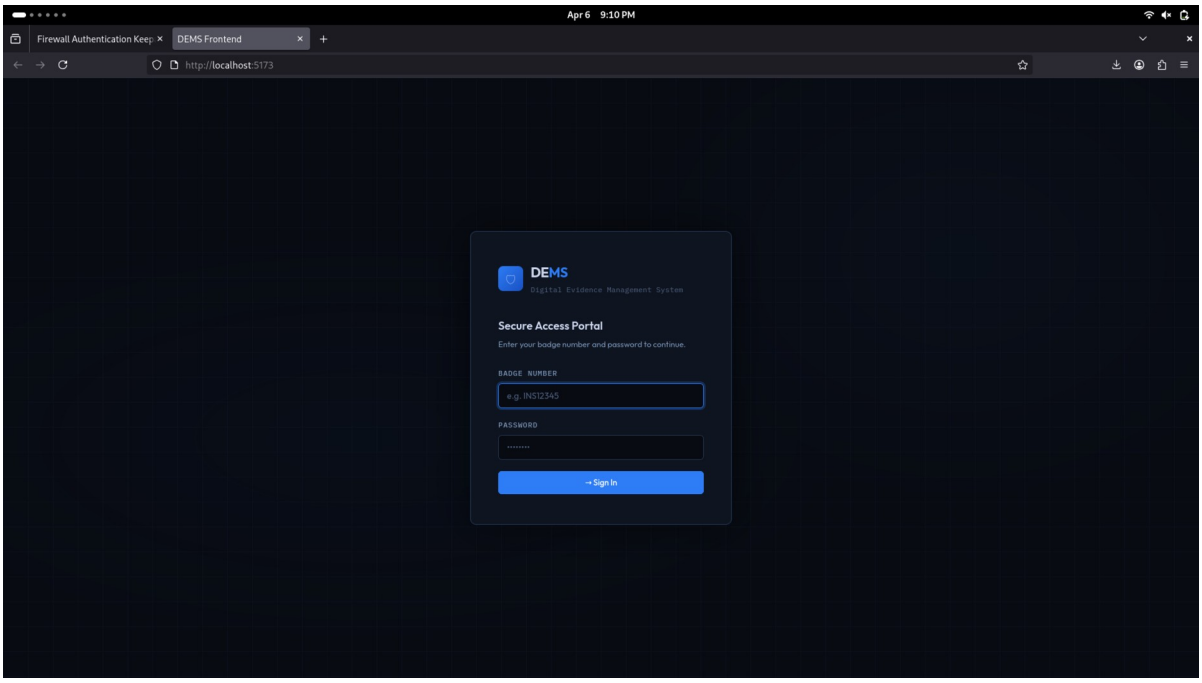


4.On dashboard , can see the the cases assigned particularly to him/her , no. of active cases , no. of closed cases , no. of total cases , etc:



#4.Some common functionalities available for all users irrespective of roles:

1.Authentication window:



2.Changing password-would get acknowledgement message on the given email address(the one entered while creating the user)-every user can do this particularly for themselves:

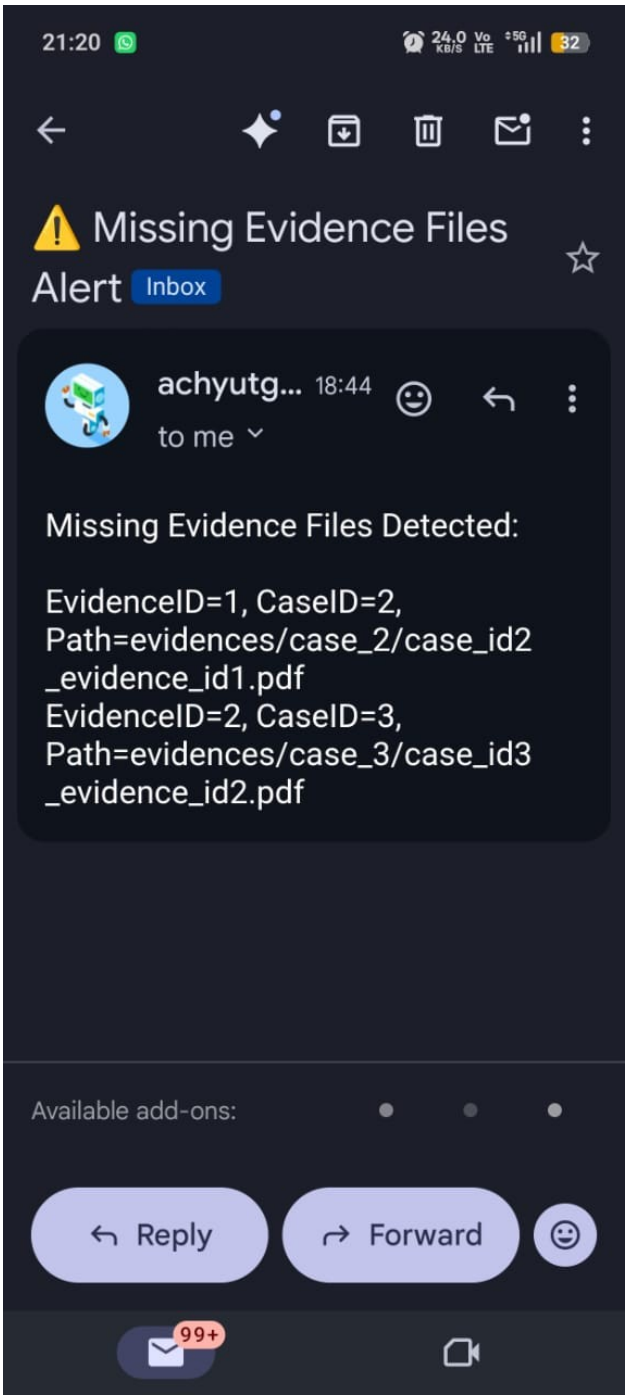
5.UNIQUE FEATURE:


1.System continnously keep track of all the evidences-to be more clear , if a evidence file is deleted from database and it still has a entry of that file then a message through email would be sent to the admin notifying the same:
